  13. MMCBC
  14. Advanced Trauma/Clinical Training (ATCT)
  15. Advanced Applied Science (formerly REALITI-4)
- 

**BRIEF JOB DESCRIPTION:**

NCOIC of Medical Section. Receives general and specific guidance from the Medical Operations Officer. Assists the PA and NMSO for both medical and analytical operations. Assists in acute care of injured team members including trauma, advanced cardiac life support (ACLS) and advanced life support for hazardous materials patients (ALSHAZ).

Responsible for planning and tracking patient evacuation actions during mass casualty events. Works as a secondary Science Officer operating Analytical Laboratory System (ALS) equipment sets and participates in Proficiency Analytical Testing (PAT) IAW ISO 17025. Selectee will be required to demonstrate an aptitude for complex scientific concepts,

including an ability to recognize the release of toxic industrial chemicals, chemical and biological warfare agents, or radiological materials. Selectee will be able to identify medical hazards utilizing warning placards, signs and symptoms of exposed persons, or other available resources. Selectee will be required to understand how hazards affect a local populace, including transmission, persistency, decontamination methods and medical treatment protocols of specific hazards. Conducts scientific hazard analysis and makes health service support recommendations as part of the CST Operations Team to identify hazardous materials and mechanisms of release. Recommends sampling collection plans in consultation with the Nuclear Medicine Science Officer, Survey Team Leader or as an independent CST representative. Participates in technical decontamination or emergency decontamination procedures. Selectee will be knowledgeable on medical countermeasures for casualties resulting from hazardous materials exposure, patient extraction, crime scene evidence preservation techniques and chain of custody sample transfer procedures. Selectee will actively participate in mission briefing processes while deployed, including the review of all known information on the hazard, wind direction and speed, safety precautions, sample preparation and testing. Manages Medical Section training schedules and maintains records in the Digital Training Management System (DTMS). Performs additional duties as assigned.

Personnel assigned to the Civil Support Team must be able to perform basic HAZMAT Technician duties. This would include:

- a. Wearing personal protective equipment that weighs approximately 50 pounds and carrying monitoring equipment averaging 20 pounds, while performing hazardous materials technician tasks.
- b. Operating in environments of high noise, poor visibility, and limited mobility at heights; and in enclosed or confined spaces.
- c. Making rapid transitions from rest to near-maximal exertion without warm-up periods.
- d. Requiring the member to work for long periods of time, requiring sustained physical activity and intense concentration.
- e. Performing a variety of tasks on slippery, hazardous surfaces.
- f. Wearing fully encapsulated level A suit for at least one hour.

**SELECTING SUPERVISOR:** LTC Scott H. Hier
